

# Connect with your doctor using Elation's Patient Passport

- ✓ Securely receive messages and attachments from your provider  
(ie. lab results, visit summaries)
- ✓ Always have access to appointment date and clinical profile information
- ✓ Directly send messages back to your provider in-app any time  
(only available if enabled by your provider)

## How to sign up

1

Look for an email from Elation Passport Support in your email inbox (including junk mail). It will be sent to the email address that your provider's office has on file for you. Click "Sign into Passport" within the email to be directed to the registration web page.

2

An invitation code will be sent to your mobile phone via an SMS text message or, if given to you by your provider's office, will be available on the printed registration page. Ask your provider today for an invitation code if you do not already have one.

3

On the Registration Page create a password and enter your Passport invitation code in the field labeled "Invitation Code" Press "Submit" and you're done

Indicate whether the account you are registering for is for you (the patient) or for an individual that you are the caregiver/legal representative of. If you have multiple Passport accounts because you see multiple Elation providers or are the caregiver for multiple individuals, you may access those accounts through a single login. You may also sign up with the same email address, and link the accounts after.
